

# Applied AI, digital engineering and secure modernization for companies and government agencies.

## — WHO WE ARE

**One standard:  
it has to work.**

Artheus LLC helps companies and government agencies put AI, data and secure engineering to work on the decisions and systems that matter most. Clients start with one fixed-scope service, see a measured result, then decide the next step.

## — SOLUTIONS

## SERVICES (A SELECTION)

|                        |                                                                                                                                                                      |                                                                                                      |

## — OUR OWN NUMBERS

Measured on our own company and our own software. Our record is small and real.

## 110/110

NIST SP 800-171 score, posted in SPRS

CMMC Level 2 (Self) affirmed in SPRS, about two months after formation.

## 0.974 1.000 37.5 s

F1, connectors Provenance Full corpus on CPU

**Document-to-model pipeline**

Measured at private expense on a synthetic test corpus: 18 documents, 7 formats, 40 planted defects. No controlled or classified material. Technology readiness level 3.

## FirstShift

WORKING PROTOTYPE

Our own product: adaptive, multilingual AI that checks frontline workers understand safety-critical procedures.

Facility clearance: not currently held

## — HOW WE WORK

- 01 Fixed scope.** A defined question, deliverable and end point, agreed before we start.
- 02 Measured.** We agree how success is measured up front and show you the numbers at the end.
- 03 Build it to last.** Documented as we go, and your team is trained to run it.

## — HOW TO WORK WITH US

## Prime, subcontractor or teaming partner

- GSA Multiple Award Schedule: offer in preparation
- Other Transaction agreements: pursuing OTA consortium memberships
- Prime or subcontractor, and open to teaming
- Set-aside and simplified acquisitions
- Commercial contracts and purchase orders

## — INDUSTRIES

## Commercial and government

### Defense & National Security

Federal & Civilian Agencies  
Including transportation

### Energy & Critical Infrastructure

### Manufacturing & Industrial

Defense Suppliers & Technology Companies  
CMMC and market entry

International Development  
Monitoring and evaluation

## — CONTACT

**Tell us the problem.**  
**We will suggest the first step.**

A short conversation is enough to tell whether we can help and which service fits. Commercial or government, prime or subcontract, the first step is the same.
